

Kevin P. Reilly, Sr.
Louisiana Education Quality Trust Fund

2016 Annual Report

Kevin P. Reilly, Sr. Louisiana Education Quality Trust Fund

History of the LEQTF

The Kevin P. Reilly, Sr. Louisiana Education Quality Trust Fund was established in 1986 in the state constitution by Louisiana voters to improve the quality of education in the state. In 2013, by Act 56 of the Legislature, the fund was officially renamed the Kevin P. Reilly Sr. Louisiana Education Quality Trust Fund (LEQTF) in honor of the late former State Representative Kevin P. Reilly Sr. of Baton Rouge, Louisiana. One of Mr. Reilly's proudest legislative accomplishments was the creation of the trust fund, then commonly known as the 8(g) fund. Mr. Reilly sponsored the legislation to permanently dedicate the proceeds from an oil and gas royalty settlement with the federal government for the benefit of elementary, secondary and higher education. This action was a reflection of his lifelong support for education. The LEQTF receives funds through the Federal Outer Continental Shelf Lands Act and deposits them in what is known as the Permanent Fund. From this Permanent Fund, a separate Support Fund was created to receive and hold 75 percent of the earnings from investment income and royalty income and 25 percent of the earnings from net capital gains/losses. Conversely, the Permanent Fund receives and holds 25 percent of the earnings from investment income and royalty income and 75 percent of the earnings from net capital gains/losses. Annual monetary allocations are made from the Support Fund to two state agencies: BESE for Prekindergarten through 12th grade and Regents for all public higher education. This report documents the financial condition of the LEQTF and the activities sponsored by these two state agencies receiving allocations from the Support Fund.

Annual and Cumulative Allocations

The Treasury invests the LEQTF in order to preserve the fund's capital, enhance its market value and provide a stable and predictable income. The Treasury's guiding principle for LEQTF investments is to maximize taxpayers' benefits for years to come.

After first allocating earnings pursuant to Act 698 of the 2001 Regular Louisiana Legislative Session, net earnings are then split 50/50 between BESE and Regents. However, differing appropriations and expenditures may cause slight variations in allocation balances between the two agencies from year to year.

The LEQTF allocated \$21.55 million to BESE and \$21.61 million to Regents for Fiscal Year 2015-2016 (FY 2016). Over the life of the LEQTF, it has allocated a total of \$1.635 billion to these two agencies, making it a stable source of revenue for a variety of educational enhancements and opportunities for Louisiana students at every level of education.

Within BESE, this fund is known as the 8(g) fund, and within Regents it is called the Board of Regents Support Fund (BoRSF). Please note that it is normal for the allocation amounts reported here for BESE and Regents to vary slightly from the total award amounts reported by those two agencies in their respective sections of this report.

Investment Results & LEQTF Income

There are three major sources of income for the LEQTF: Investments, Capital Gains/Losses and Royalties. For FY 2016, the LEQTF earned a total of \$81.75 million in income from all sources, which include interest, dividends, securities lending income, capital gains/losses and royalty income. For FY 2016 the total income from all investment sources (interest, dividends, securities lending and capital gains/losses) was \$74.15 million.

Investments

As stated earlier, 75 percent of these earnings are credited to the Support Fund and 25 percent are reinvested in the Permanent Fund. Investment Income from interest, dividends and securities lending allocated to the Support Fund totaled \$38.728 million, while investment income allocated to the Permanent Fund totaled \$35.423 million.

Interest Income: The LEQTF holds a variety of fixed-income investments, including U.S. Treasury and Agency securities as well as other investment-grade bonds. LEQTF earnings from coupon interest for FY 2016 totaled \$27.825 million.

Dividend Income: The LEQTF invests in the stocks of publicly traded companies. These companies distribute their earnings to shareholders in the form of dividends. Dividend income from LEQTF equity investments in FY 2016 was \$11.743 million.

Securities Lending Income: LEQTF securities holdings are sometimes temporarily loaned to major Wall Street brokerage firms, providing an additional source of income for the fund. For FY 2016, the LEQTF earned \$261 thousand in additional income through the securities lending program.

Capital Gains/Losses

For FY 2016, the LEQTF experienced \$34.32 million in capital gains during the year from the sale of assets. Of these gains, the Support Fund realizes 25 percent of all capital gains or losses, and the Permanent Fund realizes 75 percent.

Royalties

Income from royalties in FY 2016 was \$7.6 million from natural gas production on the Outer Continental Shelf in the Gulf of Mexico, subject to the 8(g) settlement with the federal government. This portion of the fund’s income is a direct result of natural gas prices and tends to fluctuate as production and processing rise and fall. For instance, in FY 2015 the income from royalties was \$15.662 million and has averaged about \$21.5 million since the inception of the LEQTF.

It is important to note that once the market value of the Permanent Fund reaches \$2 billion, all investment income will be credited to the Support Fund, and recurring royalty income will revert to the state’s General Fund.

History of Income from All Sources and Annual Allocations *

	Total From Investments	Total From Royalties	Total to Fund	Permanent Fund	Support Fund	Allocation to Regents	Allocation to BESE

Major Sources of Income Graph

Investments Performance Comparison

For FY 2016, the LEQTF fixed income portfolio earned a total rate of return of 5.44 percent, while the Barclays Government/Credit bond index – the fixed income portfolio’s internal benchmark – earned 4.33 percent. Total rate of return includes both interest income and capital appreciation. However, the LEQTF’s fixed income portfolio is managed to maximize investment income for its beneficiaries. LEQTF’s Vanguard institutional equity index funds returned 0.58 percent, while LEQTF’s internally managed equity dividend income fund returned 20.74 percent for the fiscal year. The S&P 500 index benchmark returned 3.99 percent.

The Total Return for the LEQTF in Fiscal Year 2016 was 5.47 percent. The LEQTF legislative benchmarks are the 30-day Treasury Bill and the Two-year Treasury Note. The 30-day Treasury Bill returned 0.11 percent and the Two-year Treasury Note returned 1.25 percent for the period covered by the fiscal year.

Board of Regents Support Fund Overview

Funded Programs and Investments, 1987-2016

Overview

Now operational for almost 30 years, the Board of Regents Support Fund (BoRSF) has provided more than \$870 million to public and independent campuses across Louisiana to meet its twin goals of enhancing the quality of post-secondary education and fostering economic development. Four constitutionally mandated strategies govern the allocation and expenditure of BoRSF funds: enhancement of academic, research and agricultural departments and units; carefully defined research efforts; endowment of chairs for eminent scholars; and recruitment of superior graduate students. Currently 42 campuses are eligible to compete for funding, and all have received BoRSF support through one or more programs.

Statewide Results

- BoRSF funds have helped campuses to secure **research and educational infrastructure, cutting-edge equipment, student training opportunities, and support for superior faculty** across all postsecondary levels.
- External funding agencies have awarded **more than 3,200 grants and contracts** to Louisiana higher education institutions as a direct result of BoRSF investments, yielding a rate of return during the life of the award of more than \$1.50 per BoRSF dollar expended. Significantly higher returns have been generated from grants received after BoRSF funding has ended.
- **Endowed funds, inclusive of non-State and BoRSF contributions, total almost \$1 billion** in market value and comprise **more than 3,000 scholarship and faculty accounts**.
- BoRSF research has led to the **filing of almost 500 patents** during the life of the awards.
- **Expanded multi-campus collaborations** have increased competitiveness for federal R&D money.

Programs & Subprograms

**BoRSF ALLOCATIONS TO FOUR CONSTITUTIONAL PROGRAMS
FYs 1986-87 THROUGH 2015-16**

Endowed Chairs for Eminent Scholars

The Endowed Chairs for Eminent Scholars Program was established in 1988 as a matching grants opportunity to leverage private-sector contributions and attract eminent scholars to Louisiana. A minimum \$600,000 contribution of private funds is required, which is matched with \$400,000 from the BoRSF to create a minimum \$1 million endowed chair. The same private funds:BoRSF ratio can be used to endow chairs at higher endowment levels, in increments of \$1 million. Since its inception, the Endowed Chairs for Eminent Scholars Program has awarded in excess of \$148 million in matching funds to establish 320 chairs at 25 campuses across the State. Of the 320 total chairs established, 50 have been matched at the \$2 million level, two at \$3 million, and one at \$4 million.

Recruitment of Superior Graduate Students

The Recruitment of Superior Graduate Students Program is designed to help attract students of superior ability to Louisiana master’s and doctoral programs, and encourage top graduates from the State’s higher education institutions to pursue advanced degrees. It consists of three competitive subprograms:

- The **Traditional Graduate Fellows** program primarily supports fellowships across all disciplines for excellent doctoral-level students but also allows student stipends in master's-level programs of distinction.
- **Board of Regents/Southern Regional Education Board Graduate Fellowships to Promote Diversity** help successful universities build diversity in graduate programs by recruiting and retaining excellent under-represented minority doctoral candidates.
- **Endowed Superior Graduate Student Scholarships**, introduced in FY 2015-16, match \$40,000 in Support Fund dollars for a minimum \$60,000 non-State contribution to establish permanent scholarship funds to support graduate and professional education at all levels.

The Board has invested \$100.4 million in the Graduate Fellows Program since 1987, funding 1,616 master's and doctoral fellowships and 51 endowed scholarships at 16 campuses.

Research & Development

The Research and Development Program provides competitive grants for basic and applied research projects with the potential to contribute to the knowledge base and the State's economic development. Awards are made in three subprograms:

- The **Research Competitiveness Subprogram (RCS)** is a stimulus program directed toward researchers at the threshold of becoming competitive in the Federal R&D marketplace. It is designed to assist eligible researchers in overcoming barriers that have prevented them from competing successfully at the national level for R&D funds. A one-year component of RCS includes opportunities for faculty with specific short-term research needs to prepare for federal funding competitions.
- The **Industrial Ties Research Subprogram (ITRS)** funds applied research with significant near-term potential for contributing to the development and diversification of the Louisiana economy. Accordingly, all proposals and funded projects must demonstrate strong interest from and continued involvement by the private sector and/or non-State public agencies. A component within ITRS, the Proof-of-Concept/Prototype Initiative, funded initially in FY 2015-16, targets work needed to prepare research innovations for the marketplace.
- The **Awards to Louisiana Artists and Scholars (ATLAS) Subprogram** provides support for major scholarly and artistic productions with potential to have a broad impact on a regional, national, and/or international level. ATLAS awards facilitate the completion of manuscripts for publication and the mounting of creative productions including recordings, performances, and gallery exhibitions.

Since 1987, the Board has invested \$154.2 million in approximately 1,600 R&D projects across 23 campuses. All R&D components are competitive and engage the services of out-of-state consultants to review and make recommendations relative to proposals submitted for consideration.

Enhancement

The Enhancement component includes the widest variety of programs and supports the broadest range of activities in the Support Fund. Through Enhancement, the BoRSF operates competitive programs for departments and units, as well as competitive and non-competitive endowment programs and matching for federal awards:

- **Traditional Enhancement** is a competitive program which provides opportunities to improve the quality of academic departments or units in all disciplines and at all academic levels, thus enhancing the infrastructure of individual institutions and the capacity of higher education across the State. Emphasis is on the purchase of instructional and research equipment, although other types of enhancements are allowed. Proposals, reviewed by teams of out-of-state experts, are judged principally on the value and potential impact of proposed enhancements. Approximately 3,200 competitive Enhancement projects have been funded since 1987.
- **Enhancement's Endowment Programs – Endowed Professorships, First-Generation Endowed Undergraduate Scholarships, and BoRSF Endowed: Two-Year Student Workforce Scholarships** match a non-State donation with a Support Fund contribution to establish an endowed fund to support a faculty member or student. Endowed Professorships and Undergraduate Scholarships are non-competitive, offering guaranteed matches for a specified number of slots, while the Two-Year Workforce Scholarships will be fully competitive and externally reviewed. In Endowed Professorships, added to the Support Fund in 1990-91, matching funds help campuses recruit or retain faculty whose research, teaching, and public service uniquely contribute to the mission of their departments and institutions. Established in FY 2007-08, the Endowed First-Generation Undergraduate Scholarships program matches non-State contributions to endow scholarships in support of undergraduate students who are the first in their families to attend college. To date, matching has been provided for 2,409 Endowed Professorships at 39 campuses and 153 First-Generation Undergraduate Scholarships at 22 campuses. New in FY 2015-16, Two-Year Student Workforce Scholarships enabled community and community-technical colleges to begin building an inventory of endowed scholarships specifically targeting degree and certificate programs contributing to Louisiana's highest priority workforce needs, matching 27 slots in its initial competition.
- **Federal Matching** leverages Support Fund monies to compete for funds from federal research programs, particularly through the Experimental Program to Stimulate Competitive Research (EPSCoR). The Board has also matched Enhancement monies to obtain federal grants that implement and sustain statewide education reform efforts. Between 1987 and 2016, federal programs awarded more than \$380 million to joint federal/State initiatives, for which the BoRSF provided match of \$90 million.

As the most inclusive program, Enhancement represents the largest investment of BoRSF monies, committing \$466 million over three decades to fund thousands of competitive projects, endowments, and matching opportunities across eligible campuses statewide.

Kevin P. Reilly, Sr.

Louisiana Education Quality Trust Fund

Louisiana Board of Elementary and Secondary Education FY 2015-2016

Program Funding

BESE allocates earnings from the Kevin P. Reilly, Sr. Louisiana Education Quality Trust Fund - 8(g) on an annual basis for the enhancement of elementary and secondary education. The annual program and budget for the allocation of 8(g) funds is developed in compliance with activities delineated in the 8(g) Policies and Procedures Manual (Title 28: Bulletin 921) and according to the BESE Strategic Plan. Projects are selected, and the budget is weighted based on conformity to the education purposes set forth in the Constitution. The emphasis is reflected in the method of allocation selected. Administrative costs associated with managing the funds are limited to three percent of the average amount of actual expenditures for the three most recent prior fiscal years.

BESE and the 8(g) staff operate within three fiscal years and oversees all activities for the 8(g) Student Enhancement Block Grant Program, and the 8(g) Statewide Grant Program. During the current year of project implementation, the BESE 8(g) office begins building the annual program and budget for the upcoming fiscal year and oversees the fiscal monitoring (audits) of projects implemented in the previous fiscal year.

When building the 8(g) Annual Program and Budget, BESE follows a set process. Each year, a public hearing is held to receive input from the public-at-large regarding the expenditure of Support Fund proceeds for elementary and secondary education. Next, the 8(g) Advisory Council, comprised of educators and administrators from all levels, as well as representatives of business, labor, the Parent Teacher Association, and the Legislature, meets to review the minutes from the public hearing and to recommend priorities to the Board. Also, BESE requests statewide project budget projections for review and analysis by Board staff and receives the 8(g) Annual Report of prior year projects, including evaluation results and expenditures, to determine cost effectiveness and project impact.

BESE awards grants on an annual basis, using funding methods such as block, competitive, and statewide grants – and focuses its endowments on improving classroom teaching and learning. Local schools and school systems submit project proposals that are written according to published guidelines and funded through a review process. Through innovative programming, BESE strives to:

- build expectations of academic excellence;
- require accountability of performance;
- provide superior instruction/state-of-the-art technology; and

- enhance educational leadership.

BESE 8(g) 1986-2016 Funding Overview

- More than 7,700 projects since 1986
- More than \$904 million allocated since 1986

Constitutional Categories:

BESE is constitutionally mandated to allocate funds for any or all of the following purposes:

- To provide compensation to city or parish school board professional instructional employees;
- To ensure an adequate supply of superior textbooks, library books, equipment, and other instructional materials;
- To fund exemplary programs in elementary or secondary schools designed to improve elementary or secondary student academic achievement or vocational-technical skill;
- To fund carefully defined research efforts, including pilot programs, designed to improve elementary and secondary student academic achievement;
- To fund school remediation programs and preschool programs;
- To fund teaching of foreign languages in elementary and secondary schools; and
- To fund an adequate supply of teachers by providing scholarships or stipends to prospective teachers in academic or vocational-technical areas where there is a critical teacher shortage.

2015-2019 BESE Strategic Plan Goals:

- Expand high-quality Pre-K-12 college and career-ready pathways that align to workforce demands;
- Develop a talent system that recruits, prepares, supports, retains, and continuously builds the capacity of teachers and leaders to ensure student success;
- Maintain a system of high-quality and accountable educational options for students and families; and
- Use limited resources in the most strategic and equitable ways possible to increase and support student achievement.

2015-2016 Priority Areas:

- High-Quality Early Childhood Education;
- College and Career Readiness;
- Teacher and Leadership Development; and
- Technology and Innovation

Since 1988, BESE 8(g) has funded more than \$210 million in pre-kindergarten programs

Since inception, BESE 8(g) has funded more than:

- \$50 million for certification of teachers;
- \$47 million for state required testing;
- \$36 million for superior textbooks; and
- \$41.5 million for virtual/state-wide distance learning

Student Enhancement Block Grant Program

The Elementary/Secondary Block Grant Program provides funds for projects that serve as catalysts for student academic or vocational technical skill improvement. Participants select from designated focus areas in accordance with local priorities. Eligible participants are limited to public and nonpublic systems, public independent schools, and nonpublic independent schools meeting eligibility requirements.

Block grant guidelines and application packets are published each year in the spring, and proposals are due for BESE approval in the fall of each year. Based on a per pupil allocation, eligible systems and schools receive block grant funding according to enrollment figures taken from the previous year. Agencies may apply for block grant funds for any Board-focused project for up to four consecutive years.

Annually, selected block grant projects are evaluated by independent evaluators, who have been selected by BESE. Evaluators conduct site visits to designated schools receiving funding and report on the strengths and weaknesses of the project design as well as the impact on student learning.

Statewide Grant Programs

The statewide programs are administered by state agencies, generally the Louisiana Department of Education (LDE), in order to provide goods (such as equipment), services (such as staff development), or flow-through dollars to schools or school systems. The programs target specific participants and/or focus on common goals determined by the administering agency. Some statewide programs are implemented on a pilot basis with selected sites, while others impact large numbers of schools and students throughout Louisiana.

Each year BESE allocates a percentage of the overall 8(g) budget for the statewide grant programs, and the program design and budgets are approved by BESE. The agencies administering the Statewide Programs have an individual and particular system for funding, as well as identifying and notifying participants. Districts or independent schools apply directly to these agencies for program guidelines and funding methods.

Annually, independent evaluators, selected by BESE, conduct visits to local program sites around the state. Evaluators interview teachers, administrators, and central office supervisors to determine how well the program is operating and whether the program is meeting specific performance objectives.

BESE 8(g) Funded Program Summary

Total 2015-2016 Allocation: \$24,500,000

- 151 Student Enhancement Block
- 13 Statewide
- 164 Total Grants**

Student Enhancement Block Project Results

8(g) Program Evaluators conducted site visits and overall project evaluations for assigned projects, using forms and procedures prescribed by the BESE - 8(g) office. Projects were evaluated in six categories:

1. Purpose;
2. Activities;

3. Personnel;
4. Resources;
5. Objectives and Evaluation; and
6. Results.

All projects submit an End-of-Year Report of results to the BESE - 8(g) office. After reviewing the End of Year Reports, program evaluators assign final evaluation scores out of a possible 150 points.

Block projects receiving a final evaluation score of below 100 for two consecutive years are ineligible to receive continued funding. For projects scoring below 100, the agency is required to submit a written explanation of implementation problems and a plan for corrective action.

Statewide Program Results

Each project submits an End of Year Report of results to the BESE - 8(g) office, detailing the regions served, as well as the number of participating school districts, public, and nonpublic schools.

8(g) Program Evaluators conduct site visits and overall program evaluations for assigned programs using forms and procedures prescribed by the BESE - 8(g) Office.

Programs are evaluated in six categories:

1. Participants;
2. Personnel;
3. Activities;
4. Constitutional Category;
5. Objectives and Evaluation; and
6. Results.

After reviewing the End-of-Year Reports, Program Evaluators assign final evaluation scores out of a possible 150 points. Evaluators also offer program observations and recommendations, based on the overall evaluation of the programs.
